

Ultra Hygienic Squeegee

Vikan Setting New Standards in Security,
Safety and Hygiene

Ultra Hygienic Design

Food safety and the avoidance of cross contamination is a key driver behind the stringent hygiene rules and health and safety legislation that is directed at the food and beverage industry. It is also a major concern as a failure to comply can result in product recalls or the destruction of products, which could damage brand integrity and company reputation. Preventing cross contamination from microbes and ingredients requires a hygienically clean environment while a visibly clean site reassures customers and visitors.

Vikan's Ultra Hygienic squeegee provides a practical and effective solution to the food and beverage industry's challenge of ensuring efficient hygienic cleaning in safety critical environments. The squeegee has been developed in close collaboration with customers as they strive to improve standards of hygiene and eliminate microbial and contamination issues.

- ✓ Prevention of food contamination incidents
- ✓ Compliance with auditor requirements
- ✓ Documented evidence of product quality and efficacy
- ✓ Prevention of product rejection or recall
- ✓ Compliance with FDA and EU food standard regulations
- ✓ Product choice security

Unique Features to Meet Industry Requirements

- ✓ Autoclavable up to 121°C

Food Contact Compliant

- ✓ FDA [CFR 21] and EU [10/2011] food contact compliant

Ultra Hygienic Squeegee

This Ultra Hygienic Squeegee has a flexible and effective rubber lip, which ensures effective cleaning of floors and other surfaces. The rubber lip is angled to enable cleaning close to walls and around equipment. The squeegee's splash guard ensures that liquid does not contaminate dried surfaces.
