

Declaration of compliance

Regarding the following items: 31713 - UST Broom, 400 mm, Soft, Blue
31733 - UST Broom, 400 mm, Medium, Blue
41793 - UST Hand Brush w/short handle, Stiff, Blue
41963 - UST Hand Brush w/long Handle, Stiff, Blue
45813 - UST Bench Brush, Soft, Blue
45853 - UST Bench Brush, Medium, Blue
70643 - UST Deck Scrub, 400 mm, Blue

Business operator: **Vikan A/S**

Materials: **The brush block is made from glass reinforced polypropylene.**
Monomers and additives used to manufacture this grade are listed in Commission Regulation (EU) No. 10/2011 of 14. January 2011 on plastic materials and articles intended to come into contact with foodstuffs. Current amendments 321/2011 (1. April 2011), 1282/2011 (10. December 2011), 1183/2012 (30. November 2012) and 2015/174 (5. February 2015) are included.

Polytetramethylene terephthalate (PBT) filaments.
Monomers and additives used to manufacture this grade are listed in Commission Regulation (EU) No. 10/2011 of 14. January 2011 on plastic materials and articles intended to come into contact with foodstuffs. Current amendments 321/2011 (1. April 2011), 1282/2011 (10. December 2011), 1183/2012 (30. November 2012) and 2015/174 (5. February 2015) are included.

Blue masterbatch used in the brush block and in the filaments.
Monomers and additives used to manufacture this grade are listed in Commission Regulation (EU) No. 10/2011 of 14. January 2011 on plastic materials and articles intended to come into contact with foodstuffs. Current amendments 321/2011 (1. April 2011), 1282/2011 (10. December 2011), 1183/2012 (30. November 2012) and 2015/174 (5. February 2015) are included.

Additives with specific migration limit (SML) are used in the polypropylene, in the masterbatch and in the PBT for filaments. Migration analyses are showing that all materials comply with these SML.

Following dual use additives are used: Carbonic acids (salts), Silicon dioxide and Stearic acid.

FDA: All raw materials in this product are in compliance with FDA (Food and Drug Administration in the USA) 21 CFR parts 170 to 199.

EU Commission: In accordance with EU Commission Regulation no. 1935/2004 the product is intended for food contact. The product can be marked with the "glass & fork" symbol on the packaging or on the product itself through moulding.

The product is produced according to EU Commission Regulation no. 2023/2006 on good manufacturing practices for materials and articles intended to come into contact with food (GMP).

Overall migration tests are made on the products. The products meet the requirements regarding overall migration to 10 % ethanol, 3 % acetic acid and isooctane (substitute to olive oil). During the migration tests the products were exposed to 10 % ethanol and 3% acetic acid for 18 hours at 40 °C, and in Isooctane for 4 hours at 20°C.

Direct food contact: Max. temp. 40°C

Other usage temperature: Min. temp. -20 °C
Max. temp. 80 °C

General: It is recommended that equipment is cleaned, disinfected and sterilised, as appropriate to its intended use, before use.
It is also important to clean, disinfect and sterilise equipment as appropriate after use, using the appropriate decontamination chemicals, concentrations, times and temperatures.
Appropriate equipment decontamination will minimise the risk of microbial growth and cross contamination and will maximise the efficiency and durability of the equipment.

Max. Wash temp.: 121 °C

Date: 13th August 2015
